DETAILED ACTION

Claim Objections

The claim objections are withdrawn because of the amendments to the claims.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-5, 11 are rejected under 35 U.S.C. 102(b) as being anticipated by Chen (USPN 5,242,424).

Chen discloses a venting system for an infusion drip chamber, comprising an automatic air eliminator (221), a mechanical eliminator (25), a conduit, a plunger, biasing device, and at least one vent opening (Figures 1-7 and entire reference).

Allowable Subject Matter

3. Claims 6-10, 12-15 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

4. Applicant's arguments filed 10/07/04 have been fully considered but they are not persuasive.

The applicant is arguing that reference number 221, is not an automatic air eliminator. The examiner disagrees with the applicant's interpretation because the duct

has the ability to eliminate air from the top of the reference number 221, before and when "the covering" is not in place (24). This can be seen in Figure 1.

There is no structure associated with the term "automatic air eliminator," thus the limitation is a functional limitation that is performed by the structure, and this function can be performed by reference number 221. Air will have the ability to flow out of the duct and thus the duct has the ability to be an automatic air eliminator. The examiner has made claims 6-10, & 12-15 allowable, due to the hydrophobic filter that comprises the automatic air eliminator.

Conclusion

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
